

**Opinion of the Romanian Chamber of Deputies on the
Communication from the Commission to the European Parliament, Council, the European
Economic and Social Committee and the Committee of the Regions
Pharmaceutical Strategy for Europe
COM(2020) 761**

Concerned about the complexity of the institutional and regulatory framework for health protection in the European Union, the Chamber of Deputies supports the pharmaceutical strategy for Europe as an essential pillar of the vision of a stronger European Health Union, recommends complementing the pharmaceutical strategy with specific objectives and actions to ensure access to medicinal products for all individuals and recommends that electronic information on the pharmaceutical product be designed and match both the interest of healthcare professionals and the information needs of the public.

It also recommends the establishment of a mechanism for mutual assistance and the transmission of information between Member States to ensure timely access to medicinal products, to address the shortcomings encountered during the pandemic, and to carry out information campaigns to reduce confusion between medicines and food supplements.
