What would I do if I were in your shoes?

- Drop the Tobin Tax because
 - 1) the tax revenue is very uncertain
 - 2) the tax will be passed on
 - 3) the tax will result in inefficient markets and destabilisation
 - 4) the financial crisis was triggered by other products
- Pay attention to significant shifts in values of real assets when interest rates change
- Tighten up capital requirements markedly of products that contributed to the financial crisis, e.g. CDO and CDS
- If banks are to generate additional tax revenues, it would be preferable
 - to introduce a payroll tax, or
 - increase the corporate tax rate

But ...

- In any case, a higher tax will, in an uncontrolled and non-transparent way, be passed on to the customers

 JYSKE BANK

Thank you for your time!
